Fadel Muhammad

Software Development

About

Passionate and results-driven Full-Stack Developer with over five years of hands-on experience in designing, developing, and deploying scalable web and mobile applications. Skilled in building robust systems using modern frameworks like React, Laravel, and Spring Boot. I thrive in fast-paced environments that challenge my problem-solving and analytical skills. Throughout my career, I've successfully contributed to the development of financial systems, merchant platforms, and enterprise-level applications that enhance business performance. I am deeply committed to writing clean, efficient code and continuously improving my technical expertise through learning and innovation.

Education

Universitas Bina Sarana Informatika
Diploma in System Information | **2017 – 2020**

Professional Experience

- **PT Mitra Transaksi Indonesia | Software Development** **Jan 2022 – Present**

  i. Developed and maintained PWA QRIS Mandiri (Livin Usaha) using React JS and Spring Boot.
  ii. Designed and implemented an Anti-Fraud Detection System for Bank Mandiri to enhance transaction security.
  iii. Built and optimized an Inventory Management System improving data accessibility and performance.
  iv. Developed Nyala Merchant By OCBC and Training Website Apps for internal employee learning.
  v. Collaborated with cross-functional teams to fix bugs, add new features, and maintain API documentation.
  vi. Led backend architecture using microservices with Spring Boot for high scalability.

- **PT Rekayasa Aplikasi Digital | Full-Stack Developer** **Oct 2020 – Dec 2021**

  i. Served as Lead Developer for Sekolahdigi & Bantubeli projects.
  ii. Developed and deployed scalable web and mobile applications using Laravel and Express.
  iii. Integrated payment gateways and third-party logistics services into e-commerce systems.
  iv. Coordinated between backend, frontend, and mobile teams to ensure smooth product delivery.

v. Improved user experience and backend efficiency through code optimization and refactoring.

- **PT Sahabat Sejahtera | Full-Stack Developer** **Jan 2019 – Oct 2020**

i. Built a responsive company catalog website using CodeIgniter.
ii. Managed product data and optimized content management workflows.
iii. Ensured system stability and scalability through proactive maintenance and performance improvements.

Achievements

i. Successfully optimized inventory management processes, resulting in company budget savings of over 4 billion IDR /year.
ii. Improved API response time by 40% through microservice architecture enhancements.
iii. Recognized for high-quality code and consistent delivery of critical business applications.

Technical Skills

- Programming: Java, JavaScript, PHP, TypeScript
- Frameworks: Spring Boot, React JS, React Native, Laravel, Express Js, NestJs
- Databases: Oracle, MySQL, Firebase (Non-SQL)
- Tools: Git, Docker, Kubernetes, Nginx, Postman, Jenkins
- Concepts: REST API, Microservices, Agile Development, Data Structures, CI/CD

Languages

English: Fluent (Written & Spoken)
Bahasa Indonesia: Native
